

SPOTTED GUM : A GREAT CHOICE

Simple yet unique, a wonder of nature.

Spotted Gum is an Australian hardwood, known for its colour, strength and durability. It is classified as class 1 durable above ground i.e. 40 years (AS5604, 2005)

It's intriguing name hails from the way it sheds its bark. Unlike other trees that shed in strips and patches, the Spotted Gum sheds its bark in elliptical strips leaving a soft mottled colour and a spotted pattern on the tree, causing it to be a stand out in any forest
