

DOMINATOR®

THE WORLD'S MOST ADVANCED GARAGE DOOR SYSTEMS

A TRADITIONAL NEW ZEALAND FAVOURITE

Roller Garage Doors

Roller Garage Doors

A TRADITIONAL NEW ZEALAND FAVOURITE!

Timeless styling combined with strength, safety and security. Enhance your home's street appeal while enjoying the good looks that a Dominator® roller garage door offers you. The stylish yet subdued, fine-line, ribbed pattern compliments virtually any house style – from contemporary to traditional – smooth-wall, weather board, brick or stone. Experience also the functional advantages, like the smooth, quiet operation and the maximum use of the space, both on your drive and inside your garage.

DOMINATOR®

CUSTOM MANUFACTURE

Dominator® roller doors are manufactured to customers opening dimensions. We build your door to fit your requirements, rather than making your plans conform to standard sized doors. A perfect fit is assured.

FINISH / COLOUR CHOICE

Choose from Zinalume® or a pre-painted finish from our standard colour range – view samples from your Dominator® distributor. By following simple maintenance instructions supplied with your door it will retain its appearance for years to come.

PERFECT BALANCE AND OPERATION

Our carefully researched spring formulae and precision manufacture combine to provide perfect balance for easy, smooth operation with minimal maintenance.

MAXIMUM USE OF SPACE

The vertical operation of your roller door means you can park right up to it without worry of damage to your vehicle when the door is operated. Because the door doesn't protrude beyond the front of your garage you can utilise all of your drive for greater convenience. Inside, you can make maximum use of ceiling space.

SAFETY AND SECURITY

A Dominator® roller door is always supported in its side tracks. This, and its vertical operation, provide for greater safety. Your door won't unexpectedly blow open or shut, drop or swing. You should also consider the addition of an automatic opener.

DUST AND WIND RESISTANCE

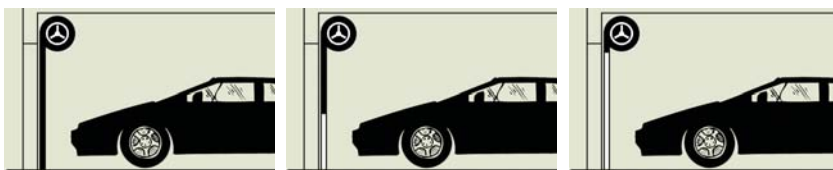

A closed Dominator® roller door effectively seals out dust, debris and rain, particularly important where you have valuable items stored in your garage.

AUTOMATIC OPERATION

From the comfort and security of your car a push of a button will open and close your garage door – so easy and a real plus in the chilly months of Winter. Dominator® roller doors are designed to operate in tandem with the appropriate Dominator® automatic door opener for the optimum in performance and security. See our Roller Door Opener brochure for more details.

INSTALLATION

Dominator® roller garage doors are supplied, installed and serviced by any of our authorised Dominator® distributors.

Above main: the clean appearance also suits smooth contemporary styling

Above inset: a convenient, attractive choice for multiple door applications
