

Sto Brick Bag-wash System

For new or old brick construction

The Sto Brick Bag-wash System offers a variety of sponge render finishes to compliment architectural brick-work and design. The Sto Bag-wash system for brick and block veneer provides for the perfect combination of properties; decorative, durable, strong, hard-wearing, impact-resistant, malleable, weather-resistant, colour-stable and highly resistant to micro-organisms. In addition, its vapour permeability allows your building to breathe while still repelling water.

The perfect finish

Sto Coloured brick bag-wash finishing renders

Manufactured in Germany for guaranteed quality and consistency

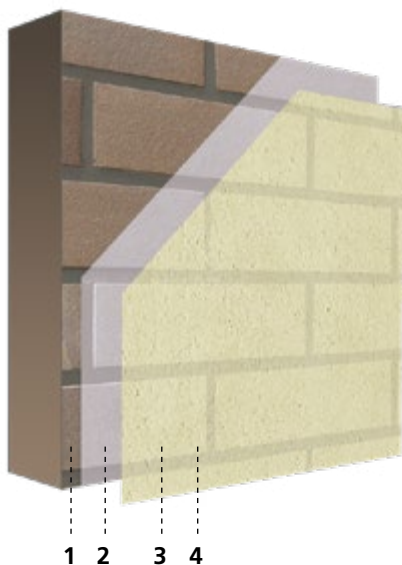

Sto Brick Bag-wash finishing renders incorporate the latest technology; certified globally and successfully applied in all climatic zones world wide for over 50 years. The finish is part of the Sto Brick Bag-wash System that has been extensively tested and backed by a Sto10 Year Coating Warranty.

StoColor Coating System

The StoColor coating system compliments the architectural structure and design, with 800 shades or matched to the colour of your choice using the Sto Spectrometer. Further more opposition mineral renders rely on paint to achieve stability and colour. Sto renders are through-coloured, so the intensity of colour and everyday wear will not affect the appearance or stability of the rendered exterior facade.

Benefits at a glance

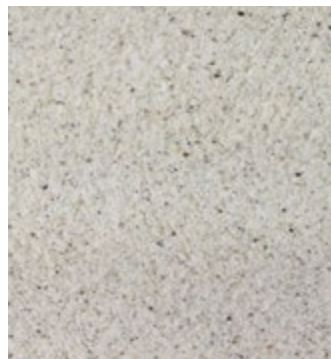

- Available in the full spectrum of colours.
- Extremely low water absorption.
- Optimum surface adhesion.
- Shock-proof and highly resistant to cracks.
- Exceptional resistance to mechanical stress.
- Outstanding colour retention and product stability.
- Highly resistant to micro-organisms.
- Free from solvents and plasticisers.

Stolit MP: Coloured fine float, sponge or light adobe finishing render.

Stolit MP Natural: Coloured fine finish float, sponge or light adobe sand speckled finishing render.

Sto RFP Sponge: Coloured course grained render.

Sto Brick Bag-wash System

- 1 Substrate: Brick or Block Veneer Construction**
- 2 Sealer: Sto Putzgrund**
Water based primer in a pail, containing an organic binder and good adhesion properties.
- 3 Finishing Render: Sto Coloured Finishing Renders**
Organically bound, highly weather resistant, strong, hard wearing, impact-resistant, pre-coloured finishing renders.
- 4 Coating: StoColor Facade Paint**
Finishing coating based on IQ Technology for functional facades.
