

150MM WEATHERPROOF COWL RANGE

Options for all applications - from wall to soffit and also where high back pressure is experienced.

COWL SOLUTIONS

DCT1031 - Weatherproof cowl including backdraught flap for wall mounted applications. Includes bird mesh option for soffit mounting. Simply remove the flap and insert the mesh.

Wall/Soffit

DCT1031 White Cowl with Flap/bird mesh

DCT1995 - With aluminium fixed louvre, designed for either wall or soffit mounting and the grille plate has a free area of 0.009m² (compared to the original flap of 0.010m² when open) so it has little effect on performance of the cowl. For use where high winds are experienced so a fixed non-return plate is required.

Wall/Soffit

DCT1995 White Cowl with Fixed Plate

DCT3616 - Stainless steel weatherproof cowl including backdraught flap & Mesh for wall mounted applications. A stylish option for modern design & architecture. Available with mesh - no flap also.

Wall

DCT3616 Stainless Cowl with Flap
