Paintable Access Panel

Matt, with Beaded Trim

**Pre Primed** Paint Ready

NEW

EASY ACCESS
To ceiling spaces and bulk heads

BEADED FRAME
And noise reducing liner

HANDLE-LESS
Push-catch closing system

Masons Paintable Access Panel provides easy access through non-fire rated dry lined walls and ceilings to concealed spaces. This panel is made from pre-finished matt MDF with a 'push-catch' closing system, a metal frame, beaded plaster-ready trim and a noise reducing liner.

This hatch is perfect for both residential and commercial buildings.

Applications

Easy access to: **Ceiling Spaces and Bulk Heads.**

Roof Access; for Insulation, framing, inspection of underlay and roofing. Vermin control.

Installation Guide

1. Measure across the inner flanges for the access panel.
2. Cut a hole in the plaster board to match measured panel size adding 2.5mm each side for clearance (e.g. 605 x 605mm for the 600mm panel).
3. For 600 x 600 mm access panel, frame out the cut opening on the hidden (non visible) side of the plaster board. Check access panel fit before fixing off the opening framing.
4. Bend the steel tie tags, located around the inside of the frame to the vertical position and slot the hatch (without door for easy installation) into the framed opening.
5. Secure the steel tie tags to the stud or support framing OR fold them over to secure to the plaster board.
6. Fix screws through the access panel frame and tags to the timber supporting framing until the access panel is flush and securely fixed.
7. Insert the door and secure with screws provided.
8. Plaster in the beaded trims surrounding the access panel.
9. Paint the access panel and plastered areas to match.
