

Western Red Cedar

PremSelect / Grade Description

Hermpac's highest grade of 'Feature' Canadian Coastal Western Red Cedar

Characterised by knots and other natural characteristics throughout the board

No selection for grain or colour

A range of natural and machine made defects allowable in the grade

Prior sorting of boards and cross cut removal of grade characteristics will be required by the customer to meet either their own end use requirements or those of the NZ Building code and/or NZ Standard requirements for Dressing Grade weatherboards.

Visual Reference

A selection of typical cuts, these are examples only

Availability

Available in a range of Hermpac Weatherboard, Panelling and Moulding profiles

Available in Dressed, Bandsawn and Sanded Face finishes

Available in random lengths only

General Notes

1. In general, a parcel of timber in any grade shall contain a range in quality from the most defective piece permitted in that grade to a piece which just fails to comply with the requirements of the next, higher grade.
2. When timber is visually graded, a reasonable difference of opinion between graders is recognised. However, the provisions of these rules are sufficiently explicit to establish a maximum allowable inclusion of 'Off-Grade' or 'Below Grade' of five percent (5%) in any parcel. This must be regarded as an acceptable, allowable variation.
3. It is advisable for all customers to be familiar with both the requirements of the New Zealand Building Code, those of their local approving authority and the terms under which their Building Consent is granted in regard to profiles, grades and fixing.
4. All grades of Hermpac Western Red Cedar are supplied with professional packaging, including a light protective top sheeting for dressed products.
5. All Western Red Cedar is invoiced by length and/or tally metre tally.
6. It should be expected as a natural consequence of drying, that knots (when present) may include seasoning checks or splits.
