

METAL
FENCING

METALCRAFT FENCING CAN BE USED IN DIFFERENT DESIGN SCENARIOS

Metal fencing provides you with greater versatility and can be used as infill panels between block or brick columns. Metalcraft Fencing can be installed in both flat and sloping sites, please consult your nearest Metalcraft Fencing branch for actual site limitations.

PEACE OF MIND

Metalcraft Fencing has no toe holds, this makes it harder to climb up giving you more peace of mind.

DURABLE

Metalcraft Fencing offers the longevity and durability of steel and saves you the trouble of post painting.

COLORSTEEL®

Metalcraft Fencing panels are manufactured from locally sourced steel from New Zealand Steel in COLORSTEEL® ENDURA®. The G550 high tensile steel is strong, robust, durable and low in maintenance.

PROFILE OPTIONS

Metalcraft Fencing is available in 2 popular profiles. The Aztec profile offers a wide pan for a sleeker cleaner look and Kāhu® offers a contemporary symmetrical profile that looks great from both sides of the fence.

AZTEC PROFILE

Aztec has strong defined lines. The Aztec profile has a raised five rib trapezoid form on one side, and a flat aspect on the other. Aztec is a very popular profile that will complement any home or project. Manufactured from double sided 0.35BMT G550 Colorsteel® Endura®. Standard fence height of 1.8m. Custom heights are also available.

Dimensions are nominal and may vary. Check with your nearest Metalcraft Fencing branch for profile dimensions.

KĀHU® PROFILE

A contemporary look with strong defined shadow lines. The Kāhu® profile has a high rib symmetrical profile which looks great from either side of the fence. Manufactured from double sided 0.40BMT G550 Colorsteel® Endura®. Standard fence height of 1.8m. Custom heights are also available.

Dimensions are nominal and may vary. Check with your nearest Metalcraft Fencing branch for profile dimensions.

POST AND RAILS

An innovative roll formed post and rail system offers the dual benefit of strength and ease of installation. A key advantage of this fencing system is that our steel posts and rails are robust enough to eliminate the need for any intermediate rails, affording clean lines and a tidy look on both sides of the fence.

The post and rails are manufactured from double sided 0.75BMT G550 galvanised steel from New Zealand Steel and are available as standard in the same colours as the fence. If you want you can also request post and rails in another complementary colour to the metal fence panels. Refer to the 6 stocked colours for options.

RANGE OF GATES

Metalcraft Roofing has a range of gates to complement the standard range of Metalcraft fencing and accessories. Please contact your local Metalcraft Branch for more information.

POOLSIDE & BARRIER FENCE

Poolside and barrier fencing require specific design requirements outside the standard scope of Metalcraft Fencing. Please contact your nearest Metalcraft Fencing branch as to the suitability of Metalcraft Fencing for these specific areas.

METAL FENCING

STEP BY STEP INSTALLATION

Metalcraft fencing is simple to install. Posts are screwed together back to back before being secured in position, which gives them considerable strength in the ground. The rail sections are designed to slip inside the post profile snugly to ensure a good fit, then screwed in place to retain the infill panels. Our posts and rails are pre-painted to your requirements and run in fixed lengths to simplify ordering and minimise labour on site. Easy installation videos available: www.metalcraftgroup.co.nz

- 1 Set the string line
- 2 Mark the post holes
- 3 Dig the post holes
- 4 Assemble intermediate posts
- 5 Erect end posts
- 6 Cement end posts
- 7 Reset the stringline for intermediate posts
- 8 Erect intermediate posts
- 9 Insert and fasten bottom rails
- 10 Drop in infill panels
- 11 Insert and fasten top rails

TOOLS REQUIRED

- Pegs
- Stringline
- Measuring tape
- Spray can
- Shovel or auger
- Level
- Bungee cord
- Wheelbarrow
- Vice grips
- Drill or tek gun
- Tek drive bit

Kāhu® - Great look both sides of the fence

COLOURS

Metalcraft Fencing is available in 6 popular double sided colours from New Zealand Steel in COLORSTEEL® ENDURA®. For non-stocked colours please check availability and minimum order quantities with your local Metalcraft Fencing branch.

We strongly recommend checking your chosen colour against an actual sample of the product before purchasing as varying light conditions and limitations of the printing process will affect colour tones. These can be obtained from your nearest Metalcraft Fencing branch.

DISCLAIMER

As part of Metalcraft Roofing's policy of continued improvement, final specifications may vary from those contained in this publication. The company reserves the right at any time and without notice to change the design, materials or features and withdraw products from the market without incurring any liability whatsoever. This publication is issued as a general guide only and should not be treated as a substitute for technical advice. Contact with your nearest Metalcraft branch is recommended to confirm current specifications and availability.

UP TO 10 YEAR MATERIAL WARRANTY*

Metalcraft Fencing Panels are backed by a warranty of up to 10 years from NZ Steel Ltd. for COLORSTEEL® ENDURA® in moderate environments only. This warranty of metal fencing is subject to exclusions, application and eligibility criteria.

*Terms and conditions apply. For full terms and conditions and to determine the exclusions and eligibility of your Metalcraft fence for the warranty. Please download the Metalcraft Fencing's -Warranty and Maintenance Guide. Available on www.metalcraftgroup.co.nz or contact your nearest Metalcraft Fencing branch.
