RURAL & FENCING

HOME FENCING AT ITS BEST

For over 80 years Hurricane has provided a range of high quality, hard wearing products made to last in New Zealand's harsh environment.

The Hurricane Home Fence System, in addition to providing a perimeter barrier through its vertical bar design, allows full through vision giving endless scope for landscaping and views. Ideally suited to those locations where security, visual appeal and integrity of access share equal importance.

An attractive and effective result can be achieved by using either the fold top or square top panels, used in conjunction with Home Fence square posts which have a flanged option, enabling the post to be secured to existing paving or deck. Add to this the free swinging simple catch home fence gate and excellent results can be achieved.

Square top panels are an attractive new slimline profile offering a modern style of home fencing.

The Home Fence System is constructed of the highest quality material which is galvanized for long life protection and like all Hurricane products is 'Built to Last'.

Fold top panels are the accepted profile recognised as a superior fence solution.
