Product Use and Scope

Ardex WPM 195 & WPM 196 are used as single or multi-layered membranes in horizontal or vertical applications for waterproofing for below ground tanking. They are primarily applied to the outside of a sub-structure of a building, such as a foundation or basement to resist hydrostatic water pressure and prevent water ingress. Other forms of tanking where these products can be used include under floor slabs, behind masonry walls, the lining of substrates of in situ or precast concrete; retaining walls, lift shafts, tunnels and living roofs.
