

# Ventia Iron Black Self-Adhesive RAB Underlay

## Product Description and Technical Statement

Ventia Iron Black offers high performance, vapor permeable, water resistive barrier, a total solution when protecting the building envelope.

Ultimate fully adhered weather protection for RAB wall systems while still allowing exceptional breathability.

Made exclusively for New Zealand by mdm NT in Poland ([www.mdmnt.com](http://www.mdmnt.com))

- \* Meets and exceeds NZBC requirements.
- \* Ventia Black self-adhesive is suitable for use as a roof and wall underlay on Structural Insulation Panel (SIP) construction or Cross Laminated Timber (CLT) construction.
- \* May be used as a wall underlay adhered to rigid underlays of plywood, OSB boarding, and fibre cement fixed to timber or steel-framed walls. Plywood must be a minimum 7 mm thick and fibre cement sheet be a minimum of 6 mm thick.
- \* May be used as a temporary weathertightness protection to allow the internal works buildings to proceed before the wall cladding is installed.
- \* Suitable for All Wind Zones, including Extra High.
- \* Withstands 90 days UV exposure, Fire Retardant.
- \*(This product is currently in testing for both European Codemark and NZ Branz appraisal)
