

SMART SENSE

360° Flush Mount PIR Sensor

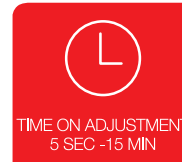

SMART SENSE is a discrete recessed PIR sensor for automated lighting control. Capable of switching either AC or DC loads, it provides automatic movement sensor control for new or existing lighting.

Time on and the level of light at which the unit becomes operational are easily adjustable by the user. The manual override function allows the lighting to stay on, overriding the PIR function when required.

Order Code: LHT0142

Switches either AC or DC loads
Large 2kW Switching Capacity
Auto/Manual Control

VOLTAGE: 220 - 240VAC 50Hz
