

BEACH HOUSE

DEFINITION

The MEGAFLOOR system for finishing concrete floors “means” mechanically grinding and polishing using diamond tools. MEGAFLOOR has four primary finishes and variants to accommodate all conditionals and requirements.

PRODUCT DESCRIPTION

BEACH HOUSE is a classic salt & pepper diamond polished finish. It requires the removal of 1-2mm of concrete laitance to reveal the underlying fines. A lightly ground floor incorporates the natural contours of the concrete, with the addition of a resin diamond polish. Ideal for newly laid floors where placing can be controlled to achieve a flat surface.

DESIGN GUIDELINES

COMMERCIAL, RETAIL, INDUSTRIAL, RESIDENTIAL, OLD AND NEWLY LAID CONCRETE.

ENVIRONMENTAL

MEGAFLOOR BEACH HOUSE is a mechanically polished surface with no coatings. The floor has a long service life and high strength reducing maintenance and the environmental burden to a minimum.

COMPLIANCE STATEMENT

Is an acceptable solution to the building code

- B2 Durability
- H1 Energy Efficiency
- AS/NZS 3661.1

SCOPE OF USE

Finish for any new or existing concrete floors.

SPECIAL CONDITIONS

Grinding must be done by **Polished Concrete Ltd** or approved agent. Old floors must be of a suitably flat nature to achieve this finish.

MAINTENANCE

Regularly use only water and diamond cleaning pads with auto scrubber to maintain a clean and functional floor. A high speed burnish with diamond cleaning pads to increase gloss levels.
