GIB-Cove®

Long-lasting Good Looks

Create a theme with the GIB-Cove® range...

It's the little things that can make a difference.

Floor coverings, paint colours and fixture styles can turn any house into your home. Style, elegance and value can be added to any room without breaking the bank by choosing one of GIB-Cove®'s distinctive architectural cove profiles.

The GIB-Cove® range offers you more flexibility and design choice with a range of quality cove profiles to suit your own personal style.

For new homes or renovations

When planning a new home, renovation or extension, keep in mind the style of the fixtures and fittings when considering cove. You may wish to mix and match cove sizes/profiles throughout your home to suit various stud heights whilst providing a distinctive look. Selecting the right cove is sometimes all that's needed to turn a plain room into a visual symphony, it can also be a simple way to add value to your home.

Creating the look is easy

Renovate a room quickly and easily with the GIB-Cove® range. With no special tools or fixing equipment required, it is simple for a tradesperson to install.

For more information

Ask your builder about the range of GIB-Cove® for your new home, renovation or extension. Or for DIY'ers, the range is available at builders supply merchants throughout New Zealand.

For your nearest distributor or installation information, call GIB® Project Support 0800 442 4663.
