

Aztec

Aztec is a more recent profile with defined lines that offers a more contemporary look. It has a raised 5 rib trapezoid form on one side, and a flat aspect on the other. It has proved to be a very popular profile that will complement any home or project. Because it is installed with the ribs running vertically, Aztec provides an additional benefit in that there are no toe holds which makes it ideal for a security application.

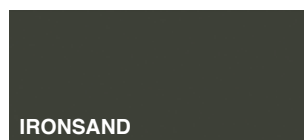

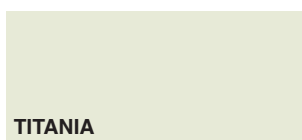

Single Sheet Width: 810mm

Two Sheets with single rib overlap: 1580mm

Triple Sheet with single rib overlap: 2360mm

Colour Pallet

Colours shown in this brochure are as close as normal printing processes allow. Contact your roofing supplier to view actual COLOURSTEEL® prepainted steel samples to confirm the exact colour.
