

20MM DECK JACK

Deck Jack

Grey

Dark Grey

Black

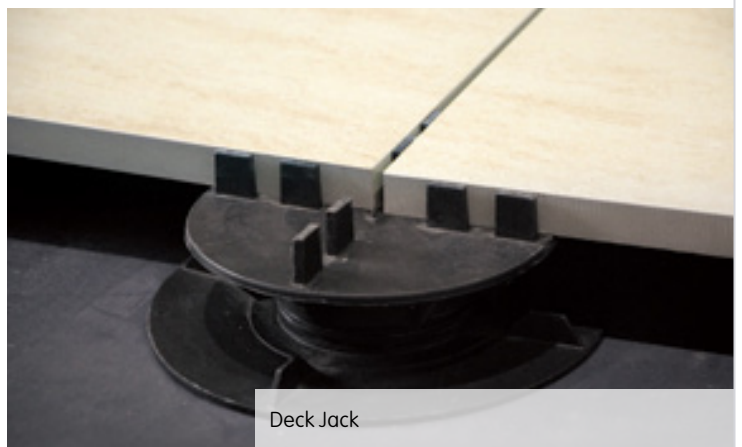

These 600x600mm by 20mm thick tiles do not require centre support so are cost effective. As they are a full-bodied porcelain they are suitable for heavy commercial use such as squares, balconies, subways, airports, parking lots, gardens, walkways and parks.

Tile Warehouse's 20mm tile ranges comply with the recent Auckland City Council's Amended Practice Note for external and internal membranes (Document number: AC2234, version 3). This document states that when tiles are to be laid outdoors, they must be laid over a floating deck, which must provide adequate clearance for ventilation purposes and not be permanently fixed to the membrane.

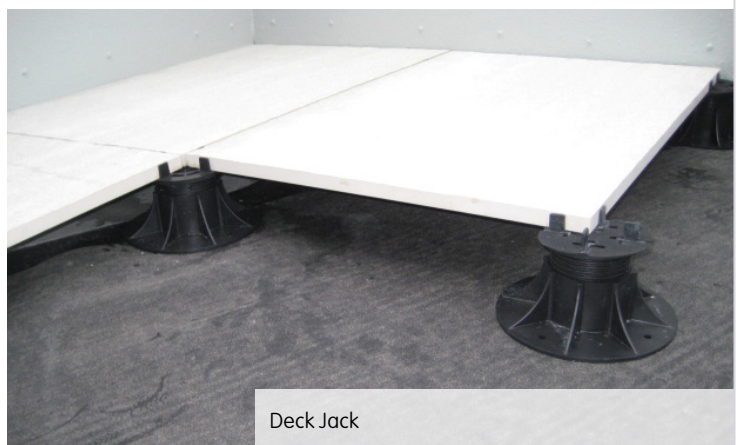

Finish: Textured

Sizes: 20x600x600mm

Other sizes may be available on order.
