NatureSteel™

Designer Garage Doors For Your Busy Lifestyle.

NatureSteel designer steel - the warmth and beauty of timber with the practicality and strength of steel - available from Garador.

Give your sectional garage door all the good looks of timber without the concerns of warping, rotting, splitting, swelling or high maintenance.

NatureSteel door panels are created from a natural looking woodgrain effect paint finish that is baked on to stay looking good year after year.

NatureSteel designer steel has the durability of everyday roofing steel with the attractive appearance of natural timber.

All the maintenance NatureSteel needs is a regular wash down - no need for continual re-staining and re-painting with protective coatings - more time for you to enjoy life.

Note: Just like natural timber, NatureSteel designer steel has a random, variable grain and colour pattern which may be slightly different in each door. The company will not accept warranty claims for variations of colour and/or grain. The company reserves the right to vary or delete colours without notice. For areas within one kilometer of corrosive environments, such as salt air or industrial fallout, special care and maintenance are generally required for metal products. Consult your dealer for advice.
