RELEVANT BUILDING CLAUSE

NZS 4246:2016.6.2.10

STATEMENT ON HOW THE PRODUCT IS EXPECTED TO CONTRIBUTE TO COMPLIANCE

Masons Insul-Baffle is designed to separate roof underlay from bulk insulation where these elements may come into contact, or the required 25mm gap between them cannot be maintained. It assists in meeting the requirements of NZS 4246:2016.6.2.10. It also allows a path for air movement as part of a passive - stack ventilated roof space design. Masons Insul-Baffle incorporates 'Dragon Channels' to increase rigidity and aid air to cross flow.

LIMITATIONS ON THE USE OF THE PRODUCT

- › Install roof cover within 21 days of installing Insul-Baffle.
