Durable, attractive, low-maintenance and easy to install

In addition to our comprehensive range of roofing, cladding and rainwater solutions, Metalcraft is pleased to announce the release of the Metalcraft Metal Fencing range.

Metalcraft fencing products are durable, attractive, and low maintenance – suitable for domestic, rural and industrial applications. Designed for ease of installation, it is ideal for D.I.Y application.

Fence sheet profiles are manufactured from locally sourced NZ Steel COLORSTEEL®

which eliminates the risk of warping, saves you the trouble of painting, and offers the durability of steel so you can trust a Metalcraft Fence to endure for many years to come.

Our product range includes metal fence panels, posts and rails, and even accessories which are all available in a variety of colours.

INSTALLATION: Metalcraft fencing is simple to install. Posts are screwed together

back to back before being secured in position, which gives them considerable strength in the ground. The rail sections are designed to slip inside the post profile snugly to ensure a good fit, then screwed in place to retain the infill panels.

Our posts and rails are prepainted to your requirements and run in fixed lengths to simplify ordering and minimise labour on site.

Aztec

A more recent profile with defined lines, Aztec offers a contemporary look. It has a raised five rib trapezoid form on one side, and a flat aspect on the other.

It has proved to be a very popular profile that will complement any home or project.

Because it is installed with the ribs running vertically, Aztec provides an additional benefit in that there are no toe holds which makes it ideal for security applications.

STANDARD COLOUR RANGE	PERMANENT GREEN	MIST GREEN	STONE	SCORIA
PREMIUM COLOUR RANGE	NEW DENIM BLUE	IRONSAND	LIGNITE	TITANIA

Posts & Rails

Metalcraft Fencing utilises an innovative roll formed post and rail system which offers the dual benefit of strength and ease of installation.

Our steel posts and rails are robust enough to eliminate the need for any intermediate rails, affording clean lines and a tidy look on both sides of the fence.

The strength of steel gives resilience and durability; it will not warp or move over time, and eliminates the need for painting common to other fencing options.

Colour range

The COLORSTEEL® prepainted steel colours shown here have been reproduced to represent actual product colours as accurately as possible.

However, we recommend checking your chosen colour against an actual sample of the product before purchasing as varying light conditions and limitations of the printing process affect colour tones.
